

Campaign Model: Workforce Influenza Vaccination

Facility:

Cleveland Clinic, Main Campus
9500 Euclid Avenue
Cleveland, OH 44195

Type of Facility:

Various community hospitals, family health centers, & specialty centers

Methods:

- Developed Cleveland Clinic's Quality and Patient Safety Institute to address employee health and infection control, as well as maximize patient safety
- Designed an intranet system for Cleveland Clinic facilities to educate and inform staff and increase immunization among workers
- In 2006, implemented mandatory intranet participation in hospital's influenza online site
- All employees required to complete an online immunization form by December 1st of each year
- Not mandatory for employees to get vaccinated

Results:

- Vaccination rate in 2004: 38%
- Vaccination rate in 2005: 55%
- Intranet participation rate in 2005: 89%
- Intranet participation rate in 2006: 81%
